INDEX BY SUBJECT MATTER 17

ARRANGEMENT OF THE INDEX BY SUBJECT MATTER

A. *Logical Analysis of Mathematical Disciplines* 17

(Cf. F 1.)

B. *Algebra*

B 1. Rational Functions. Theory of Equations. Determinants. Symmetric Functions 17

B 2. Algebraic Forms. Invariants. (Cf. F 2.) 18

B 3. Linear Associative Algebra. Hypercomplex Number Systems. Fields. (Cf. F 1.) 18

B 4. Algebra of Logic ..... —

C. *Theory of Numbers* 19

(Cf. E 1, E 2.)

D. *Analysis*

D 1. Functions of Real Variables. Point Sets 19

D 2. Functions of Complex Variables 21

D 3. Particular Functions 22

D 4. Ordinary Differential Equations. (Cf. D 2, D 3, F 4.) 23

D 5. Partial Differential Equations 24

D 6. Differential Forms ..... —

D 7. Calculus of Variations 24

D 8. Difference Equations 24

D 9. Integral Equations 25

E. *Groups*

E 1. Discrete Groups in General. (Cf. E 2.) 25

E 2. Linear Groups in Arbitrary or Special Fields 26

E 3. Continuous Groups. (Cf. E 2, F 1, F 3, G 3.) 26

F. *Geometry*

F 1. Synthetic Geometry. Non-Euclidean Geometry. Geometry of n Dimensions. Analysis Situs. (Cf. D 1, D 2.) 26

PAGE

F 2. Algebraic Geometry. Algebraic Curves and Surfaces. (Cf. B 2, D 3, E 2, F 1, F 4, F 5.) 27
F 3. Geometry of Special Space-Elements 27
F 4. Differential Geometry. (Cf. D 6.) 27
F 5. Geometric Transformations. Geometry of Motion. (Cf. E 2.) 29

G. *Applied Mathematics*

G 1. General Mechanics 30
G 2. Celestial Mechanics 30
G 3. Elasticity, Hydromechanics, and Sound 31
G 4. Electricity, Light, and Heat ..... —

INDEX BY AUTHORS

	Vol.*	pages
Alexander, J. W., II, A proof of the invariance of certain constants of analysis situs	16_2	148–154
—— On the factorization of Cremona plane transformations	17_3	295–300
—— Note on two three-dimensional manifolds with the same group	20_4	339–342
Barrow, D. F., Oriented circles in space	16_3	235–258
Bates, W. H., An application of symbolic methods to the treatment of mean curvatures in hyperspace	12_1	19– 38
Beck, H. Ein Seitenstück zur Möbius'schen Geometrie der Kreisverwandtschaften	11_4	414–448
Bernstein, B. A., A set of four independent postulates for boolean algebras	17_1	50– 52
Bianchi, L., Concerning singular transformations B_k of surfaces applicable to quadrics	18_3	379–401
Bill, E. G., An existence theorem for a problem of the calculus of variations in space	13_1	50– 58
Birkhoff, G. D., A simplified treatment of the regular singular point	11_2	199–202
—— General theory of linear difference equations	12_2	243–284
—— Proof of Poincaré's geometric theorem	14_1	14– 22
—— On a simple type of irregular singular point	14_4	462–476
—— Infinite products of analytic matrices	17_3	386–404
—— Dynamical systems with two degrees of freedom	18_2	199–300
Blichfeldt, H. F., Theorems on simple groups	11_1	1– 14
—— On the order of linear homogeneous groups (fourth paper)	12_1	39– 42
—— A new principle in the geometry of numbers, with some applications	15_3	227–235
Bliss, G. A. (with M. Mason), Fields of extremals in space	11_3	325–340
—— A generalization of Weierstrass' preparation theorem for a power series in several variables	13_2	133–145
—— (with A. L. Underhill), The minimum of a definite integral for unilateral variations in space	15_3	291–310

* The numbers in this column indicate for every paper the volume and part of volume of publication, and thus the date of publication, *e. g.*, the first paper in the list was published in April, 1915.

In this column references are made also to the *Notes and errata* published in the concluding numbers of various volumes, *e. g.*, a note to the paper by B. H. Camp appears in the *Notes and errata* of volume 16.

	Vol.	Pages
—— The Weierstrass E-Function for problems of the calculus of variations in space	15_4	369–378
—— Jacobi's condition for problems in the calculus of variations in parametric form	17_2	195–206
—— The problem of Mayer with variable end points	19_3	305–314
Blumberg, H., On the factorization of expressions of various types	17_4	517–544
—— On convex functions	20_1	40– 44
Bôcher, M., Applications and generalizations of the conception of adjoint systems	14_4	403–420
—— Note supplementary to the paper "On certain pairs of transcendental functions whose roots separate each other"	18_4	519–521
Brink, R. W., A new integral test for the convergence and divergence of infinite series	19_2	186–204
Buchanan, D., A new isosceles triangle solution of the three body problem	16_3	259–274
Camp, B. H., Singular multiple integrals, with applications to series	14_1	42– 64
—— Lebesgue integrals containing a parameter, with applications	15_1 16_4	87–106 532
Carmichael, R. D., Linear difference equations and their analytic solutions	12_1	99–134
—— On transcendentally transcendental functions	14_3	311–319
—— On a general class of series of the form $\sum c_n g(x+n)$	17_3	207–232
—— On a general class of integrals of the form $\int_0^\infty \varphi(t)g(x+t)dt$	20_4	313–322
Carpenter, A. F., Ruled surfaces whose flecnode curves have plane branches	16_4	509–532
Chittenden, E. W., Relatively uniform convergence of sequences of functions	15_2	197–201
—— On the equivalence of *écart* and *voisinage*	18_2	161–166
—— (with A. D. Pitcher), On the foundations of the *calcul fonctionnel* of Fréchet	19_1	66– 78
—— On the limit functions of sequences of continuous functions converging relatively uniformly	20_2	179–184
—— (with A. D. Pitcher), On the theory of developments of an abstract class in relation to the *calcul fonctionnel*	20_3	213–233
Clements, G. R., Implicit functions defined by equations with vanishing jacobian	14_3	325–342
Coble, A. B., An application of Moore's cross-ratio group to the solution of the sextic equation	12_3	311–325
—— An application of finite geometry to the characteristic theory of the odd and even theta functions	14_2	241–276
—— Points sets and allied Cremona groups	16_2	155–198

	Vol.	Pages
—— Points sets and allied Cremona groups (Part II)	17_3	345–385
—— Points sets and allied Cremona groups (Part III)	18_3	331–372
Cole, F. N., The triad systems of thirteen letters	14_1	1– 5
Coolidge, J. L., The metrical aspect of the line-sphere transformation	12_1	43– 69
—— A study of the circle cross	14_2	149–174
—— Congruences and complexes of circles	15_1	107–134
Conner, J. R., Multiple correspondences determined by the rational plane quintic curve	13_2	265–278
Craig, C. F., On a class of hyperfuchsian functions	11_1	37– 54
—— (with F. R. Sharpe), An application of Severi's theory of a basis to the Kummer and Weddle surfaces	15_3	236–244
Cummings, L. D., On a method of comparison for triple-systems	15_3	311–327
Curtiss, D. R., Extensions of Descartes' Rule of Signs connected with a problem suggested by Laguerre	16_3	350–360
Daniell, P. J., Differentiation with respect to a function of limited variation	19_4	353–362
Dederick, L. S., On the character of a transformation in the neighborhood of a point where its jacobian vanishes	14_1	143–148
Denton, W. W., Projective differential geometry of developable surfaces	14_2	175–208
Dickson, L. E., An invariantive investigation of irreducible binary modular forms	12_1	1– 18
—— A fundamental system of invariants of the general modular linear group with a solution of the form problem	12_1	75– 98
—— Linear algebras	13_1	59– 73
—— Proof of the finiteness of modular covariants	14_3	299–310
—— Linear associative algebras and abelian equations	15_1	31– 46
—— Invariants in the theory of numbers	15_4	497–503
—— Quartic curves modulo 2	16_2	111–120
Dines, L. L., Projective transformations in function space	20_1	45– 65
Dresden, A., On the second derivatives of an extremal-integral with an application to a problem with variable end points	17_4	425–436
—— On the second derivatives of the extremal-integral for the integral $\int F(y;\ y')dt$	18_3	373–378
Eisenhart, L. P., Congruences of the elliptic type	11_3	351–370
—— Surfaces with isothermal representation of their lines of curvature and their transformations (second memoir)	11_4	475–486
—— Certain continuous deformations of surfaces applicable to the quadrics	14_3	365–402
—— Transformations of surfaces of Voss	15_3	245–265
—— Transformations of conjugate systems with equal point invariants	15_4	397–430
—— Surfaces Ω and their transformations	16_3	275–310

	Vol.	Pages
—— Transformations of surfaces Ω (second memoir)	17_1	53– 99
—— Deformable transformations of Ribaucour	17_4	437–458
—— Transformations T of conjugate systems of curves on a surface	18_1	97–124
—— Transformations of applicable conjugate nets of curves on surfaces	19_2	167–185
—— Transformations of surfaces applicable to a quadric	20_4	323–338
Eiesland, J., On minimal lines and congruences in four-dimensional space	12_4	403–428
Ettlinger, H. J., Existence theorems for the general real self-adjoint linear system of the second order	19_1	79– 96
Evans, G. C., Volterra's integral equation of the second kind, with discontinuous kernel	11_4	393–413
—— Volterra's integral equation of the second kind, with discontinuous kernel (second paper)	12_4	429–472
—— The Cauchy problem for integro-differential equations	15_2	215–226
—— On the reduction of integro-differential equations	15_4	477–496
Fields, J. C., A method of proving certain theorems relating to rational functions which are adjoint to an algebraic equation for a given value of the independent variable	13_2	164–174
Fite, W. B., Some theorems concerning groups whose orders are powers of a prime	15_1	47– 50
—— Prime power groups in which every commutator of prime order is invariant	16_2	134–138
—— Concerning the zeros of the solutions of certain differential equations	19_4	341–352
Ford, L. R., Rational approximations to irrational complex numbers	19_1	1– 42
Fréchet, M., Sur les classes V normales	14_3	320–324
—— Sur la notion de différentielle d'une fonction de ligne	15_2	135–161
—— Sur les fonctionnelles bilinéaires	16_3	215–234
—— Relations entre les notions de limite et de distance	19_1	53– 65
Gaba, M. G., A set of postulates for general projective geometry	16_1	51– 61
Glenn, O. E., On semi-discriminants of ternary forms	12_3	367–374
—— The symbolical theory of finite expansions	15_1	72– 86
—— On the invariant system of a pair of connexes	17_4	405–417
—— The formal modular invariant theory of binary quantics	17_4	545–556
—— A memoir on the doctrine of associated forms	18_4	443–462
—— A fundamental system of formal covariants, modulo 2, of the binary cubic	19_1	109–118
—— Modular concomitant scales, with a fundamental system of formal covariants, modulo 3, of the binary quadratic	20_2	154–168
—— On a new treatment of theorems of finiteness	20_3 20_4	203–212 356

	Vol.	Pages
Graustein, W. C., The equivalence of complex points, planes, lines with respect to real motions and certain other groups of real transformations	16_1	33– 44
Green, G. M., One-parameter families of curves in the plane	15_3	277–290
—— On the theory of curved surfaces and canonical systems in projective differential geometry	16_1	1– 12
—— The linear dependence of functions of several variables, and completely integrable systems of homogeneous linear partial differential equations	17_4	483–516
—— Some geometric characterizations of isothermal nets on a curved surface	18_4	480–488
—— Memoir on the general theory of surfaces and rectilinear congruences	20_2	79–153
Gronwall, T. H., On a theorem of Fejér's and an analogon to Gibb's phenomenon	13_4	445–468
—— Some asymptotic expressions in the theory of numbers	14_1	113–122
—— On the degree of convergence of Laplace's series	15_1	1– 30
—— On the expressibility of a uniform function of several variables as the quotient of two functions of entire character	18_1	50– 64
—— On the influence of keyways on the stress distribution in cylindrical shafts	20_3	234–244
Hardy, G. H., Weierstrass's non-differentiable function	17_3	301–325
Hart, W. L., Differential equations and implicit functions in infinitely many variables	18_2	125–160
Haskins, C. N., On the zeros of the function, $P(x)$, complementary to the incomplete gamma function	16_4	405–412
—— On the measurable bounds and the distribution of functional values of summable functions	17_2	181–194
Hazlett, O. C., On the theory of associative division algebras	18_2	167–176
—— On scalar and vector covariants of linear algebras	19_4	408–420
H'Doubler, F., (with E. B. Van Vleck), A study of certain functional equations for the ϑ-functions	17_1	9– 49
Hedrick, E. R., On properties of a domain for which any derived set is closed	12_3	285–294
—— (with L. Ingold), A set of axioms for line geometry	15_2	205–214
Hildebrandt, T. H., On a theory of linear differential equations in general analysis	18_1 18_4	73– 96 540
—— On boundary value problems in linear differential equations in general analysis	19_1	97–108
Hodgson, J. E., Orthocentric properties of the plane directed n-line	13_2	199–231
Hoskins, L. M., The strain of a gravitating, compressible elastic sphere	11_2	203–248

	Vol.	Pages
—— The strain of a non-gravitating sphere of variable density	11_4	494–504
Hopkins, J. W., Some convergent developments associated with irregular boundary conditions	20_3	245–259
Hu, M. F., Linear integro-differential equations with a boundary condition	19_4	363–407
Huntington, E. V. (with J. R. Kline), Sets of independent postulates for betweenness	18_3	301–325
Hurwitz, W. A., On the pseudo-resolvent to the kernel of an integral equation	13_4	405–418
—— Mixed linear integral equations of the first order	16_2	121–133
—— (with L. L. Silverman), On the consistency and equivalence of certain definitions of summability	18_1	1– 20
Ingold, L., Vector interpretation of symbolic differential parameters	11_4	449–474
—— Functional differential geometry	13_3	319–341
—— (with E. R. Hedrick), A set of axioms for line geometry	15_2	205–214
Jackson, D., On the degree of convergence of the development of a continuous function according to Legendre's polynomials	13_3	305–318
—— On approximation by trigonometric sums and polynomials	13_4	491–515
—— On the approximate representation of an indefinite integral and the degree of convergence of related Fourier's series	14_3	343–364
—— On the accuracy of trigonometric interpolation	14_4	453–461
—— On the degree of convergence of Sturm-Liouville series	15_4	439–466
—— Proof of a theorem of Haskins	17_2	178–180
—— Algebraic properties of self-adjoint systems	17_4	418–424
Johnson, R. A., The conic as a space element	15_4	335–368
Kasner, E., The theorem of Thomson and Tait and natural families of trajectories	11_2	121–140
—— Natural systems of trajectories generating families of Lamé	12_1	70– 74
—— Conformal classification of analytic arcs or elements; Poincaré's local problem of conformal geometry	16_3	333–349
Kellogg, O. D., Harmonic functions and Green's integral	13_1	109–132
Kempner, A. J., On transcendental numbers	17_4	476–482
Kircher, E., Group properties of the residue classes of certain Kronecker modular systems and some related generalizations in number theory	16_4	413–434
Kline, J. R., The converse of the theorem concerning the division of a plane by an open curve	18_2	177–184
—— (with E. V. Huntington), Sets of independent postulates for betweenness	18_3	301–325
Lamond, J. K., Improper multiple integrals over iterable fields	13_4	434–444

	Vol.	Pages
—— The reduction of multiple L-integrals of separated functions to iterated L-integrals	16_4	387–398
Landau, E., Ueber eine idealtheoretische Funktion	13_1	1– 21
Larew, G. A., Necessary conditions in the problems of Mayer in the calculus of variations	20_1	1– 22
Lefschetz, S., On the existence of loci with given singularities	14_1	23– 41
Lennes, N. J., Note on Van Vleck's non-measurable set	14_1	109–112
Lipke, J., Natural families of curves in a general curved space of n dimensions	13_1	77– 95
Longley, W. R., An existence theorem for a certain differential equation of the nth order	15_3	328–334
Love, C. E., Singular integral equations of the Volterra type	15_4	467–476
Lovitt, W. V., A type of singular points for a transformation of three variables	16_4	371–386
Lytle, E. B., Proper multiple integrals over iterable fields	11_1 15_4	25– 36 504–505
MacMillan, W. D., Periodic orbits about an oblate spheroid	11_1	55–120
—— An existence theorem for periodic solutions	13_2	146–158
—— A reduction of certain analytic differential equations to differential equations of an algebraic type	17_3	245–258
—— On the reduction of certain differential equations of the second order	19_2	205–222
Manning, W. A., On the limit of the degree of primitive groups	12_4	375–386
—— On the order of primitive groups, II	16_2	139–147
—— The degree and class of multiply transitive groups	18_4	463–479
—— The order of primitive groups (III)	19_2	127–142
—— The order of primitive groups (IV)	20_1	66– 78
Mason, M. (with G. A. Bliss), Fields of extremals in space	11_3	325–340
Mathewson, L. C., On the group of isomorphisms of a certain extension of an abelian group	19_4	331–340
McDonnell, J., On quadratic residues	14_4	477–480
Miles, E. J., The absolute minimum of a definite integral in a special field	13_1	35– 49
Miller, B. I., A new canonical form of the elliptic integral	17_3	259–283
Miller, G. A., Groups generated by two operators (s_1, s_2) satisfying the equation $s_1 s_2^2 = s_2 s_1^2$	11_3	341–350
—— On the use of the co-sets of a group	12_3	326–334
—— Isomorphisms of a group whose order is a power of a prime	12_4	387–402
—— Infinite systems of indivisible groups	13_4	419–433
—— On the representation groups of given abstract groups	14_4	444–452
—— The ϕ-subgroup of a group	16_1	20– 26
—— Independent generators of a group of finite order	16_4	399–404
—— Finite groups represented by special matrices	17_3	326–332
—— Sets of independent generators of a substitution group	19_3	299–304

	Vol.	Pages
—— Groups possessing a small number of sets of conjugate operators	20_3	260–270
Milne, W. E., On the degree of convergence of Birkhoff's series	19_2	143–156
Miser, W. L., On multiform solutions of linear differential equations having elliptic function coefficients	17_2	109–130
Mitchell, H. B., On the imaginary roots of a polynomial and the real roots of its derivative	19_1	43– 52
Mitchell, H. H., Determination of the ordinary and modular ternary linear groups	12_2	207–242
—— Determination of the finite quaternary linear groups	14_1	123–142
—— The subgroups of the quaternary abelian linear group	15_4	379–396
—— On the generalized Jacobi-Kummer cyclotomic function	17_2	165–177
—— Proof that certain ideals in a cyclotomic realm are principal ideals	19_2	119–126
Moore, C. N., On the uniform convergence of the developments in Bessel's functions	12_2	181–206
—— On convergence factors in double series and the double Fourier's series	14_1	73–104
Moore, R. L., A note concerning Veblen's axioms for geometry	13_1	74– 76
—— On a set of postulates which suffice to define a number-plane	16_1	27– 32
—— On the foundations of plane analysis situs	17_2	131–164
—— Concerning a set of postulates for plane analysis situs	20_2	169–178
Morgan, F. M. (with J. W. Young), The geometries associated with a certain system of Cremona groups	17_3	233–244
Moulton, E. J., On figures of equilibrium of a rotating compressible fluid mass; certain negative results	17_1	100–108
Moulton, F. R., A class of periodic orbits of superior planets	13_1	96–108
Neikirk, L. I., Groups of rational transformations in a general field	11_3	294–300
Osgood, W. F., A condition that a function in a projective space be rational	13_2	159–163
—— (with E. H. Taylor), Conformal transformations on the boundaries of their regions of definition	14_2	277–298
—— On functions of several complex variables	17_1	1– 8
—— On infinite regions	17_3	333–344
—— Singular points of analytic transformations	19_3	251–274
Owens, F. W., The introduction of ideal elements and a new definition of projective n-space	11_2	141–171
Pell, A. J., Biorthogonal systems of functions	12_2	135–164
—— Applications of biorthogonal systems of functions to the theory of integral equations	12_2	165–180
—— Linear equations with unsymmetric systems of coefficients	20_1	23– 39
—— A general system of linear equations	20_4	343–355

	Vol.	Pages
Pfeiffer, G. A., On the conformal mapping of curvilinear angles. The functional equation $\phi[f(x)] = a_1\phi(x)$	18_2	185–198
Pitcher, A. D. (with E. W. Chittenden), On the foundations of the *calcul fonctionnel* of Fréchet	19_1	66– 78
—— (with E. W. Chittenden), On the theory of developments of an abstract class in relation to the *calcul fonctionnel*	20_3	213–233
Ranum, A., The groups of classes of congruent quadratic integers with respect to a composite ideal modulus	11_2	172–198
—— On the differential geometry of ruled surfaces in 4-space and cyclic surfaces in 3-space	16_1	89–110
Richardson, R. G. D., Theorems of oscillation for two linear differential equations of the second order with two parameters	13_1	22– 34
—— A new method in boundary problems for differential equations	18_4	489–518
Ritt, J. F., The resolution into partial fractions of the reciprocal of an entire function of genus zero	18_1	21– 26
—— On a general class of linear homogeneous differential equations of infinite order with constant coefficients	18_1	27– 49
Roever, W. H., The southerly deviation of falling bodies	12_3	335–353
—— The southerly and easterly deviations of falling bodies for an unsymmetrical gravitational field of force	13_4	469–490
Root, R. E., Limits in terms of order, with example of limiting element not approachable by a sequence	15_1	51– 71
Rowe, J. E., Important covariant curves and a complete system of invariants of a rational quartic curve	12_3	295–310
—— Bicombinants of the rational plane quartic and combinants of the rational plane quintic	13_3	387–404
—— Invariants of the rational plane quintic curve and of any rational curve of odd order	16_1	45– 50
Sanderson, M., Formal modular invariants with application to binary modular covariants	14_4	489–500
Sharpe, F. R. (with C. F. Craig), An application of Severi's theory of a basis to the Kummer and Weddle surfaces	15_3	236–244
—— (with V. Snyder), Birational transformations of certain quartic surfaces	15_3	266–276
—— (with V. Snyder), Certain quartic surfaces belonging to infinite discontinuous cremonian groups	16_1	62– 70
—— (with V. Snyder), Types of (2, 2) point correspondences between two planes	18_3	402–414
—— (with V. Snyder), Space involutions defined by a web of quadrics	19_3	275–290
—— (with V. Snyder), Certain types of involutorial space transformations	20_3	185–202

	Vol.	Pages
Shaw, J. B., Quaternion developments with applications	13_3	279–292
—— On parastrophic algebras	16_3	361–370
Sheffer, H. M., A set of five independent postulates for boolean algebras, with application to logical constants	14_4	481–488
Silverman, L. L., On the notion of summability for the limit of a function of a continuous variable	17_3	284–294
—— (with W. A. Hurwitz), On the consistency and equivalence of certain definitions of summability	18_1	1– 20
Simonds, E. F., Invariants of differential configurations in the plane	19_2	223–250

—— Sets of independent generators of a substitution group	19	299–304
—— Groups possessing a small number of sets of conjugate operators	20	260–270
Neikirk, L. I., Groups of rational transformations in a general field	11	294–300
Ranum, A., The groups of classes of congruent quadratic integers with respect to a composite ideal modulus	11	172–198

E 2. *Linear Groups in Arbitrary or Special Fields*

Blichfeldt, H. F., On the order of linear homogeneous groups (fourth paper)	12	39– 42
Coble, A. B., An application of Moore's cross-ratio group to the solution of the sextic equation	12	311–325
Dickson, L. E., A fundamental system of invariants of the general modular linear group with a solution of the form problem	12	75– 98
Dines, L. L., Projective transformations in function space	20	45– 65
Mitchell, H. H., Determination of the ordinary and modular ternary linear groups	12	207–242
—— Determination of the finite quaternary linear groups	14	123–142
—— The subgroups of the quaternary abelian linear group	15	379–396

E 3. *Continuous Groups*

(Cf. E 2, F 1, F 3, G 3)

Simonds, E. F., Invariants of differential configurations in the plane	19	223–250
Van Vleck, E. B., One-parameter projective groups and the classification of collineations	13 13	353–386 517
—— On the combination of non-loxodromic substitutions	20	299–312

F. Geometry

F 1. *Synthetic Geometry. Non-Euclidean Geometry. Geometry of n dimensions. Analysis Situs*

(Cf. D 1, D 2)

Alexander, J. W., A proof of the invariance of certain constants of analysis situs	16	148–154
—— Note on two three-dimensional manifolds with the same group	20	339–342
Moore, R. L., On the foundations of plane analysis situs	17	131–164
Veblen, O., Decomposition of an N-space by a polyhedron	14 15	65– 72 506

F 2. *Algebraic Geometry; Algebraic Curves and Surfaces*

(Cf. B 2, D 3, E 2, F 1, F 4, F 5)

	Vol.	Pages
Conner, J. R., Multiple correspondences determined by the rational plane quintic curve	13	265–278
Craig, C. F. (with F. R. Sharpe), An application of Severi's theory of a basis to the Kummer and Weddle surfaces	15	236–244
Dickson, L. E., Quartic curves modulo 2	16	111–120
Graustein, W. C., The equivalence of complex points, planes, lines with respect to real motions and certain other groups of real transformations	16	33– 44
Lefschetz, S., On the existence of loci with given singularities	14	23– 41
Rowe, J. E., Important covariant curves and a complete system of invariants of a rational quartic curve	12	295–310
—— Invariants of the rational plane quintic curve and of any rational curve of odd order	16	45– 50
Sharpe, F. R. (with C. F. Craig), An application of Severi's theory of a basis to the Kummer and Weddle surfaces	15	236–244
Snyder, V., Infinite discontinuous groups of birational transformations which leave certain surfaces invariant	11	15– 24
—— Conjugate line-congruences contained in a bundle of quadric surfaces	11	371–387
—— An application of a (1, 2) quaternary correspondence to the Kummer and Weddle surfaces	12	354–366

F 3. *Geometry of Special Space-Elements*

Barrow, D. F., Oriented circles in space	16	235–258
Coolidge, J. L., A study of the circle cross	14	149–174
—— Congruences and complexes of circles	15	107–134
Johnson, R. A., The conic as a space element	15	335–368
Owens, F. W., The introduction of ideal elements and a new definition of projective n-space	11	141–171

F 4. *Differential Geometry*

(Cf. D 6)

Bates, W. H., An application of symbolic methods to the treatment of mean curvatures in hyperspace	12	19– 38
Bianchi, L., Concerning singular transformations B_k of surfaces applicable to quadrics	18	379–401
Carpenter, A. F., Ruled surfaces whose flecnode curves have plane branches	16	509–532
Coolidge, J. L., The metrical aspect of the line-sphere transformation	12	43– 69

	Vol.	Pages
—— A study of the circle cross	14	149–174
—— Congruences and complexes of circles	15	107–134
Denton, W. W., Projective differential geometry of developable surfaces	14	175–208
Eisenhart, L. P., Congruences of the elliptic type	11	351–370
—— Surfaces with isothermal representation of their lines of curvature and their transformations (second memoir)	11	475–486
—— Certain continuous deformations of surfaces applicable to the quadrics	14	365–402
—— Transformations of surfaces of Voss	15	245–265
—— Transformations of conjugate systems with equal point invariants	15	397–430
—— Surfaces Ω and their transformations	16	275–310
	17	53– 99
—— Deformable transformations of Ribaucour	17	437–458
—— Transformations T of conjugate systems of curves on a surface	18	97–124
—— Transformations of applicable conjugate nets of curves on surfaces	19	167–185
—— Transformations of surfaces applicable to a quadric	20	323–338
Eiesland, J., On minimal lines and congruences in four-dimensional space	12	403–428
Green, G. M., One-parameter families of curves in the plane	15	277–290
—— On the theory of curved surfaces, and canonical systems in projective differential geometry	16	1– 12
—— Some geometric characterizations of isothermal nets on a curved surface	18	480–488
—— Memoir on the general theory of surfaces and rectilinear congruences	20	79–153
Hodgson, J. E., Orthocentric properties of the plane directed n-line	13	199–231
Ingold, L., Vector interpretation of symbolic differential parameters	11	449–474
—— Functional differential geometry	13	319–341
Kasner, E., The theorem of Thomson and Tait and natural families of trajectories	11	121–140
—— Natural systems of trajectories generating families of Lamé	12	70– 74
Lipke, J., Natural families of curves in a general curved space of n dimensions	13	77– 95
Pfeiffer, G. A., On the conformal mapping of curvilinear angles. The functional equation $\varphi[f(x)] = a_1\varphi(x)$	18	185–198
Ranum, A., On the differential geometry of ruled surfaces in 4-space and cyclic surfaces in 3-space	16	89–110

	Vol.	Pages
Smith, P. F., On osculating element-bands associated with loci of surface-elements	11	301–324
—— A theorem for space analogous to Cesàro's theorem for plane isogonal systems	18	522–540
Snyder, V., Conjugate line-congruences contained in a bundle of quadric surfaces	11	371–387
Study, E., Die natürlichen Gleichungen der analytischen Curven im Euclidischen Raume	11	249–279
Sullivan, C. T., Properties of surfaces whose asymptotic curves belong to linear complexes	15	167–196
